Hidden in Plain Sight: Sibling Influences on Adolescents’ Health and Adjustment

08/23/2021

The Psychology Department Colloquium Series Presents Dr. Shawn Whiteman: "Hidden in Plain Sight: Sibling Influences on Adolescents’ Health and Adjustment"

September 14, 2021 at 9:00 am via Zoom
Advance Registration Required

The Utah State Psychology Department and Dr. Shawn Whiteman present Hidden in Plain Sight: Sibling Influences on Adolescents’ Health and Adjustment.

Broadly, Dr. Shawn Whiteman conducts research on the connections between family socialization processes and youth’s health and socioemotional adjustment. In this talk, he will discuss how siblings directly and indirectly act as sources of social influence and social comparison within families and how their family experiences foster similarities and differences in their relationship qualities, attributes, and health-related behaviors.

Dr. Shawn Whiteman is an Associate Dean for Research in the Emma Eccles Jones College of Education and Human Services and a professor in the Department of Human Development and Family Studies. He has received awards for his research and teaching, including Utah State University’s Emma Eccles Jones College of Education and Human Services Faculty Researcher of the Year as well as Purdue University’s College of Health and Human Sciences Early Career Research Achievement Award. His research has been supported by the National Institutes of Health and Department of Defense.
